

Recognising Three-Dimensional Shapes

1 Circle the correct answer to show if each object has a curved surface, a flat face or both.

(a)

Has (curved surface / flat face)

(b)

Has (curved surface / flat face)

(c)

Has (curved surface / flat face)

(d)

Has (curved surface / flat face)

(e)

Has (curved surface / flat face)

(f)

Has (curved surface / flat face)

2 Some objects can roll because they have curved surfaces.
Circle the objects that can roll.

3 Match.

cube

cylinder

cone

cuboid

sphere

4 Which of the objects below have both curved surfaces and flat faces?
Circle them.

5 Match.

cube ●

cylinder ●

cone ●

cuboid ●

sphere ●

● has only curved surfaces

● has only flat faces

● has both flat faces and curved surfaces
